PROFESSIONAL SUMMARY

Full-stack developer and automation manager currently completing a Computer Science degree, with progressive experience moving from web development intern to junior developer to leading automation initiatives. Skilled in ReactJS, Node.js, and PHP, with practical application of SOLID principles and Lean methodology. Proactive and detail-oriented, with a strong drive for continuous learning and knowledge sharing. Advanced English proficiency and strong problem-solving and collaboration skills. Seeking to bring analytical and technical strengths to a software development or automation-focused role in Canada.

TECHNICAL SKILLS

- Front-End: ReactJS, HTML5, CSS3, JavaScript (ES6) — Advanced
- Back-End: Node.js, Express, PHP — Advanced
- Frameworks: Redux, Next.js, Tailwind CSS, Laravel — Intermediate
- Databases: MySQL
- Tools: Git/Version Control, Microsoft Office, Power BI, SharePoint
- Languages: Portuguese (Native), English (Advanced)

PROFESSIONAL EXPERIENCE

Automation Manager

plugue.ia | Remote | October 2025 – Present

- Implement AI-powered smart funnels that automatically engage, qualify, and schedule leads, providing full visibility into the sales pipeline.
- Combine technology implementation, dedicated client support, and continuous education to deliver measurable, real-world results with AI.
- Lead automation initiatives, streamlining internal processes and workflows for the organization.
- Apply technical and analytical skills to design and implement automated solutions in a fully remote environment.

Junior Web Developer

Construsite Brasil — Website & Web Portal Development Ltd. | Hybrid | April 2025 – October 2025

- Developed, maintained, and updated web systems including intranets, CMS platforms, reporting tools, and e-commerce stores.
- Worked with PHP and structured data, monitoring system logs and escalating issues through support ticket workflows.
- Applied SOLID principles and Lean methodology to improve code quality and delivery efficiency.
- Managed and maintained MySQL databases supporting production web applications.

Web Development Intern

Construsite Brasil — Website & Web Portal Development Ltd. | Belo Horizonte, Brazil | August 2024 – April 2025

- Began career as a web developer, working on internal projects for clients using PHP, JavaScript, CSS, and HTML, with a strong focus on PHP.
